

EM BodyTrim

Fat Melting & Muscle Building

EM BodyTrim is a Non-Invasive treatment that can tighten, tone, and strengthen the muscles of any body part, including the Upper Arms, Abdomen, Thighs, and Buttocks.

The ULTIMATE Body Slimming & Fat Burning Technology!

THE BUZZ.....Yes we know it... It's all over the media and now on top of customers minds! Latest technology for an up to date, effective and Non-Invasive treatment to shed stubborn fat, yet at the same time build muscle and toning multiple areas of the body The only treatment with a 2-In-1 procedure! Fat Melting and Muscle Building, both at the same time!

Combining the worlds of Athletics and Aesthetics

EM BodyTrim is a body contouring procedure that builds muscle and burns fat by delivering high-intensity focused electromagnetic pulses to the muscle tissue which creates supramaximal muscle contractions to activate muscle fibers so you can achieve the results you can't through normal exercise.

Why Choose EM BodyTrim?

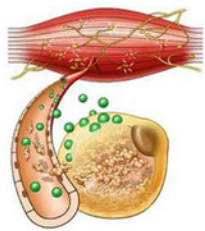

Popular among the people, a second generation EM BodyTrim machine designed with intense pulses of electromagnetic waves with advanced and innovative technology. With 2 different handles of larger sizes, it is easy to target any areas for fat melting and muscle toning. This particular technology has proven highly effective for abdominal circumference reduction and bumlifts, offering clients an easy way out to remove fat from the body and build muscles faster than ever with no downtime!

How does it work?

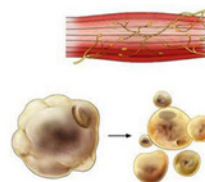

Causing upto 30,000 muscle contractions in just 30 minutes! The EM BodyTrim can help implode fat cells up to 19% by the 4th session. EM BodyTrim offers a Better and Rapid response over other fat reduction technologies.

Voluntary contractions from the machine increases the energy required to break down fat cells. The process releases epinephrine signals to initiate lipolysis. During lipolysis, triglycerides breaks down into free fatty acids (FFAs) and g-lycerol which is used as an energy source.

Intense muscle contractions releases epinephrine which triggers the lipolysis process in fat cells. Because the contractions are so intense, the lipolytic causes the fat cells to break down and promote muscle building.

The FFA causes cell dysfunction and encourages apoptosis – programmed cell death. These dead cells break down and naturally get flushed out of the body.

Benefits to the client:

- ✓ Non-Invasive and Safe
- ✓ Swift and Painless
- ✓ Requires No Downtime
- ✓ Increases muscle mass by upto 16%
- ✓ Burns off fat by upto 19% usually by the 4th session
- ✓ Circumference Reduction
- ✓ Toning, Tightening and Lifting Buttock cheeks

Benefits to Business:

- ✓ Huge Demand & Revenue Potential
- ✓ Has gained Celebrity attraction
- ✓ Easy to operate
- ✓ Better cooling system
- ✓ CE approved
- ✓ Promising results

SPECIFICATION

Cavitation:

Handle	2pcs
Frequency	25KHZ +40KHZ
Power	60W
Active surface	465.00000000000006px2
Operate Timer	1-60mins

Radio-Frequency:

Handle	3pcs: bipolar +tripolar
RF Energy	50J
Frequency	1MHZ/ 3MHZ /10MHZ

Technical Specifications:

Power of the Whole Machine	500W
Package	65*65*2750px
Gross Weight	91KGS
Screen	8.0 Inches Touch Screen
Cooling Liquid	Pure Water
